

turning spaces into experiences

With over one million business events held in the UK every year, it's understandable to want the best from your flagship entertainment spaces, and Audi are no exception.

The Manchester and O2 arenas are fantastic venues that offer the latest in global acts and entertainment. Audi recognised this opportunity and with customers who are demanding the latest in tech and style, knew this was enough reason to refresh and rethink their entertainment spaces.

The event staff at both arenas highlighted interest from other suite leaseholders as a result of these installations.

- Concept styling
- Space design

- Fit-out management
- Project comms & management

Creating spaces people want to be in
